Legal Status: Valid Cambodian E-class (Business) Visa and Work Permit

Two decades of front-end development for global retail and healthcare platforms.

Three years teaching and building tools in Cambodian classrooms. I design interfaces that work under real constraints—offline, low-bandwidth, shared devices—and I teach students to understand code before they depend on tools.

Core Work

- **IELTS Speaking Evaluator** — Progressive Web App for real-time IELTS speaking assessment. Evaluators score against official rubrics; the tool flags where performance in one criterion limits the overall result. Built in vanilla JavaScript, zero dependencies, works offline after initial load. Classroom-tested.
- **Lesson Prepper** — Pipeline: Text → structured lesson plan → customizable slide layout → editable PowerPoint export. Saves 20+ hours of weekly prep time. Python and AI-assisted structure; teachers control the pedagogy and own the output.
- **Web Dev Fundamentals** — 35-week syllabus teaching HTML5, CSS3, and JavaScript. Project-based, no prior experience required. Students learn logic and causality before frameworks.

Experience

IEP & GEP Instructor, Sovannaphumi School, Banteay Meanchey (2024–Present)

- Facilitated English, Science, and IELTS preparation across Early Years to Secondary
- Mentored students in MicroBit and Scratch for regional coding competitions focused on Sustainable Development Goals
- Built and deployed the IELTS Speaking Evaluator for classroom use

Prior: Web UI Developer, New Balance (USA) (2015–2019)

- Responsive front-end development for a global retail platform.
- Increased email click-through and conversion through UI/UX testing.
- Established internal code wiki and led technical onboarding for new engineers.

Prior: Lead CSS Developer, Andeo Group + Aetna (Remote) (2022)

- CSS and Salesforce Lightning Web Components development.
- Mentored global team on accessibility compliance and design systems.

Technical Approach

- Vanilla-first: HTML5, CSS3, Sass, JavaScript (ES6+), progressive enhancement.
- Frameworks when the problem is architectural and team scale demands it.
- AI-assisted workflow with review and refactoring standards built in
- UI/UX architecture, typography, and visual design (Fine Arts background)

Education

- **TEFL Certificate** - TEFL Universal (10/2023)
150-Hour Advanced TEFL/TESOL Certificate, accredited by ACCREDITAT.
- **Fine Arts & Graphic Communications** - University of Missouri & Saint Louis Community College (1996–2002)
Coursework in Typography, Design Principles, and Web Fundamentals.
